📍 Dubai, UAE

6+ Years Experience | 5M+ Users Served in Production | 70% Server Load Reduction | 60% Support Volume Reduction

PROFESSIONAL SUMMARY

Senior Frontend Developer (Angular / React / React Native) with 8+ years of experience designing and shipping secure, scalable, and user-friendly web and mobile applications across **fintech** and **telecom**. Proven track record of delivering high-traffic banking UIs serving **5 million+** users, building internal AI-assisted developer tooling, and integrating AI-driven chat interfaces into production applications. Skilled in **Angular, React, Node.js**, and modern frontend architecture, with strong cross-functional collaboration with backend, UX, and ML teams in agile/SAFe environments.

CORE TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, Angular, React, React Native, Redux, Next.js, RxJS, HTML5, CSS3, Material UI, Bootstrap, Three.js, PrimeNG, SASS/SCSS, LESS, Chart.js, D3.js

Backend: Node.js, Express.js, MongoDB, REST APIs, GraphQL, WebSockets, JWT, Python, SQL

Testing & Quality: Jest, Jasmine, Playwright, Cypress, Lighthouse

Tools & DevOps: Git, GitHub, Jenkins (CI/CD Pipelines), Postman, Swagger

Architecture & Practices: Microfrontends, SSR, PWA, Design Systems, Accessibility (WCAG), Data Structures & Algorithms, API Integration, AI Integration & AI Chat UIs, Performance Optimization, TanStack, Responsive Design, UI/UX Design, Cross-browser Compatibility, Google Maps API

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

Emirates NBD

Jan 2024 – Present

Dubai, UAE

- Resolved high-priority (**P1/P2**) production incidents, ensuring application stability and minimal downtime for a top-tier UAE bank.
- Built **DevInsight**, an internal developer/QA portal centralizing tools and APIs, replacing Insomnia/external sites and saving significant engineering hours.
- Integrated **TravellerPass UI** into ENBD apps from scratch using **React as a WebView** for both iOS and Android, enhancing customer access to partner deals.
- Developed reusable **React** components for ENBD's internal framework, improving modularity and delivery speed across teams.
- Delivered critical UIs — **Quick Pay, Pay Bills, Sadad Pay, Account Finder** — aligned with **SAMA standards**, and contributed to Trusted Device implementation for stronger security, serving over **5 million+** users.
- Supported **KSA digital migration** and launch, delivering mobile-like features post SAMA approval.

Frontend Developer

Verizon

Mar 2022 – Dec 2023

Hyderabad, India

- Implemented a custom UI tracking system for vendor order states, dynamically handling horizontal and vertical graph layouts to visualize complex activation workflows.
- Developed the **Order Milestones** flow for Verizon's **Dynamic Network Manager (DNM)** portal, enabling real-time tracking of multi-step change orders.
- Built the "Report an Issue" feature from scratch — capture/upload screenshots, attach files, categorize issues — cutting resource allocation by **60%** and reducing support call volume.
- Improved performance by consolidating **60+ API calls** and implementing advanced caching, reducing server load by **70%**.
- Modernized existing UIs through **micro-frontend migration** and feature enhancements, improving scalability and user engagement.

Frontend Developer

KIA Motors

Aug 2020 – Mar 2022

Kolkata, India

- Implemented the car selection module in **Angular** integrated with **AEM**, enabling users to view model-specific features dynamically for KIA Motors Europe's web platform.

PROJECTS

DevInsight | *Node.js, React* | [GitHub](#)

- Developed a **full-stack internal platform** for Emirates NBD to investigate and debug issues across UAT environments, now widely adopted by multiple teams.
- Built unified search and detail panels to fetch customer, product, device, and account information in real time.
- Implemented dynamic data exploration with clickable tables, drill-down panels, and live API calls.
- Integrated utilities such as API testing, encoding/decoding, diagramming, and environment navigation, reducing dependency on external tools.
- Designed multi-entity theming and a one-pane experience to prevent environment mix-ups and reduce troubleshooting time.
- Features developed handle **2000+ API calls/day** (KIBANA logs), significantly accelerating root-cause analysis and daily workflows.

Strings Helmet Point | *MERN Stack* | [Website](#)

Remote, Freelance

- Engineered a full-stack e-commerce platform with a responsive admin dashboard for inventory management.
- Integrated secure **PhonePe Payment Gateway** (SHA256/OAuth) and an automated **Nodemailer** system for order confirmations.
- Implemented Context API for persistent cart state; deployed on **Vercel/Render** with **Cloudinary** image optimization.

Cinemapedia | *Angular, TMDB API* | [GitHub](#)

- Created an Angular application for browsing movie details, trailers, and merchandise.
- Implemented language-genre sorting and advanced filtering using TMDB API integration.
- Developed an order tracking system with email notifications for merchandise purchases.

WebMonitor-Hub | *MEAN Stack, JWT* | [GitHub](#)

Ongoing

- Developing a MEAN-stack application that enables companies to monitor and update the status of their production websites.
- Implementing secure **JWT authentication** with verified email access restricted to authorized company admins.
- Building a centralized dashboard for real-time website status monitoring and management.

EDUCATION

Maulana Abul Kalam Azad University of Technology (MAKAUT/WBUT)
B.Tech in Computer Science; CGPA: 8.17/10

Jul 2016 – Jul 2020
Kolkata, India

CERTIFICATIONS & TRAINING

Certified SAFe® 5 Practitioner - Scrum | [Credly Badge](#)
Issued by Scaled Agile, Inc.

May 2023 – May 2024

Angular — The Complete Guide (Udemy) | [Certificate](#)
Hands-on coursework and projects in modern Angular.

Nov 2022 – Present

AWARDS & ACHIEVEMENTS

On-the-Spot Award: Recognized for impactful contributions to Emirates NBD's internal framework contribution.

GEMS Award (Q3 2025): Awarded for significant contributions to Emirates NBD's internal portal DevInsight.

Quick Pay Rollout Recognition: Awarded for impactful contributions to the rollout of Emirates NBD – KSA Quick Pay feature.

Cognizant Master Code Finalist: Selected among the top performers in Cognizant's nationwide coding competition.

Competitive Programming: 4-Star on HackerRank, 3-Star on CodeChef.
