📍 Dubai, UAE

6+ Years Experience | 5M+ Users Served in Production | 70% Server Load Reduction | 60% Support Volume Reduction

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer (React / Angular / Node.js) with 6+ years of experience designing and shipping secure, scalable, and high-performance web applications across **fintech** and **telecom**. Proven track record of delivering enterprise-grade, customer-facing digital products serving **5 million+ users**, building full-stack internal platforms with **REST APIs** and **SQL/NoSQL** databases, and integrating AI-driven features into production applications. Experienced in end-to-end software development — from responsive frontend interfaces to backend services and **CI/CD pipelines** — with strong cross-functional collaboration across backend engineers, UX designers, QA, and product teams in **Agile/Scrum** environments.

CORE TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, Angular, React, React Native, Redux, Next.js, RxJS, HTML5, CSS3, Material UI, Bootstrap, Three.js, PrimeNG, SASS/SCSS, LESS, Chart.js, D3.js
Backend: Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT, SQL (PostgreSQL, MySQL), NoSQL (MongoDB)
Testing & Quality: Jest, Jasmine, Playwright, Cypress, Lighthouse
Tools & DevOps: Git, GitHub, Jenkins (CI/CD Pipelines), Docker, Postman, Swagger, Azure DevOps
Architecture & Practices: Microfrontends, Full-Stack Development, SSR, PWA, Design Systems, Accessibility (WCAG), Security Best Practices, Data Structures & Algorithms, API Integration, AI Integration & AI Chat UIs, Performance Optimization, TanStack, Responsive Design, UI/UX Design, Cross-browser Compatibility

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer

Emirates NBD

Jan 2024 – Present

Dubai, UAE

- Resolved high-priority (**P1/P2**) production incidents, ensuring application stability and minimal downtime for a top-tier UAE bank.
- Built **DevInsight**, an internal developer/QA portal centralizing tools and APIs, replacing Insomnia/external sites and saving significant engineering hours.
- Integrated **TravellerPass UI** into ENBD apps from scratch using **React as a WebView** for both iOS and Android, enhancing customer access to partner deals.
- Developed reusable **React** components for ENBD's internal framework, improving modularity and delivery speed across teams.
- Delivered critical UIs — **Quick Pay, Pay Bills, Sadad Pay, Account Finder** — aligned with **SAMA standards**, and contributed to Trusted Device implementation for stronger security, serving over **5 million+ users**.
- Supported **KSA digital migration** and launch, delivering mobile-like features post SAMA approval.

Software Engineer – Full Stack

Verizon

Mar 2022 – Dec 2023

Hyderabad, India

- Designed and implemented a custom **full-stack** UI tracking system for vendor order states with a **Node.js** backend, dynamically handling horizontal and vertical graph layouts to visualize complex activation workflows.
- Developed the **Order Milestones** flow for Verizon's **Dynamic Network Manager (DNM)** portal end-to-end, integrating **RESTful APIs** to enable real-time tracking of multi-step change orders.
- Built the "Report an Issue" feature from scratch — capture/upload screenshots, attach files, categorize issues — cutting resource allocation by **60%** and reducing support call volume significantly.
- Optimized backend performance by consolidating **60+ API calls** and implementing advanced **SQL/NoSQL** query caching strategies, reducing server load by **70%**.
- Modernized existing UIs through **micro-frontend migration** and feature enhancements, improving scalability, maintainability, and user engagement.
- Collaborated within **Agile/Scrum** teams across sprint planning, daily stand-ups, and retrospectives, delivering features iteratively and maintaining high code quality through peer code reviews.

- Implemented the car selection module in **Angular** integrated with **AEM**, enabling users to view model-specific features dynamically for KIA Motors Europe's web platform.

PROJECTS

DevInsight | *Node.js, React, REST APIs, MongoDB* | [GitHub](#)

- Architected and developed a **full-stack internal platform** (React frontend + Node.js/Express backend) for Emirates NBD to investigate and debug issues across UAT environments, actively used by **500+ developers daily**.
- Designed and consumed **RESTful APIs** to build unified search and detail panels fetching customer, product, device, and account data in real time.
- Implemented dynamic data exploration with clickable tables, drill-down panels, and live API calls against **SQL and NoSQL** data sources.
- Integrated utilities such as API testing, encoding/decoding, diagramming, and environment navigation, eliminating dependency on external tools like Insomnia across multiple teams.
- Designed multi-entity theming and a one-pane experience to prevent environment mix-ups and significantly reduce troubleshooting time.
- Deployed and maintained the platform end-to-end, handling **10,000+ API calls/day** (KIBANA logs) and recognised with both the **On-the-Spot Award** and **GEMS Award (Q3 2025)** for its organisational impact.

Strings Helmet Point | *React, TypeScript, Node.js, Express, MongoDB* | [Website](#)

Remote, Freelance

- Engineered a production-ready **full-stack e-commerce platform** (React + TypeScript frontend, Node.js/Express backend, MongoDB) for selling motorcycle helmets, live and serving real customers.
- Built a full **product catalog** with advanced search and filtering, persistent **shopping cart** using Context API, guest checkout flow, and real-time **order tracking** by Order ID.
- Integrated secure **PhonePe Payment Gateway** (SHA256/OAuth) with mock mode for testing, and automated **Nodemailer** email notifications for order confirmations and status updates.
- Developed a secure **admin dashboard** with authentication for managing products, inventory, and orders end-to-end.
- Built with **mobile-first responsive design** using Material UI; deployed scalable infrastructure on **Vercel** (frontend) and **Render** (backend) with **Cloudinary** for dynamic image optimization and **MongoDB Atlas** for cloud database hosting.

Cinemapedia | *Angular, TMDB API* | [GitHub](#)

- Created an Angular application for browsing movie details, trailers, and merchandise.
- Implemented language-genre sorting and advanced filtering using TMDB API integration.
- Developed an order tracking system with email notifications for merchandise purchases.

EDUCATION

Maulana Abul Kalam Azad University of Technology (MAKAUT/WBUT)
B.Tech in Computer Science; CGPA: 8.17/10

Jul 2016 – Jul 2020
Kolkata, India

CERTIFICATIONS & TRAINING

Certified SAFe® 5 Practitioner - Scrum | [Credly Badge](#)
Issued by Scaled Agile, Inc.

May 2023 – May 2024

Angular — The Complete Guide (Udemy) | [Certificate](#)
Hands-on coursework and projects in modern Angular.

Nov 2022 – Present

AWARDS & ACHIEVEMENTS

On-the-Spot Award: Recognized for impactful contributions to Emirates NBD's internal framework contribution.
GEMS Award (Q3 2025): Awarded for significant contributions to Emirates NBD's internal portal DevInsight.
Quick Pay Rollout Recognition: Awarded for impactful contributions to the rollout of Emirates NBD – KSA Quick Pay feature.
Cognizant Master Code Finalist: Selected among the top performers in Cognizant's nationwide coding competition.
Competitive Programming: 4-Star on HackerRank, 3-Star on CodeChef.
